

WE MAKE PIPES, TANKS AND FITTINGS

- Fiberglass Pipes and Ducts, EPOXY, Vinyl Easter & Isophthalic.
- Butt and Wrap Lamination Joints
- Flanged Joints, Adhessive Joints
- Rubber Seal Lock Joints

all GRP site works

- Double bell coupler Joints
- We made pipes GRP Dual Helical and Filament winding Technology. FABRICATION AND INSTALLATION,

HOT PRESS MOULDED

When it comes to water tanks, apart from concrete, use of cast iron tanks was known for over 5 decades.all advantages of steel panel tanks are over shadowed by the susceptibility to corrosion and hence high maintenance coasts the advent of hot press moulded panels are low weight and have permitted storage of all types of water including highly chlorinated water and seawater the tanks design also eliminated the need for any metal parts for internal reinforcement ensuring high water quality during storage.

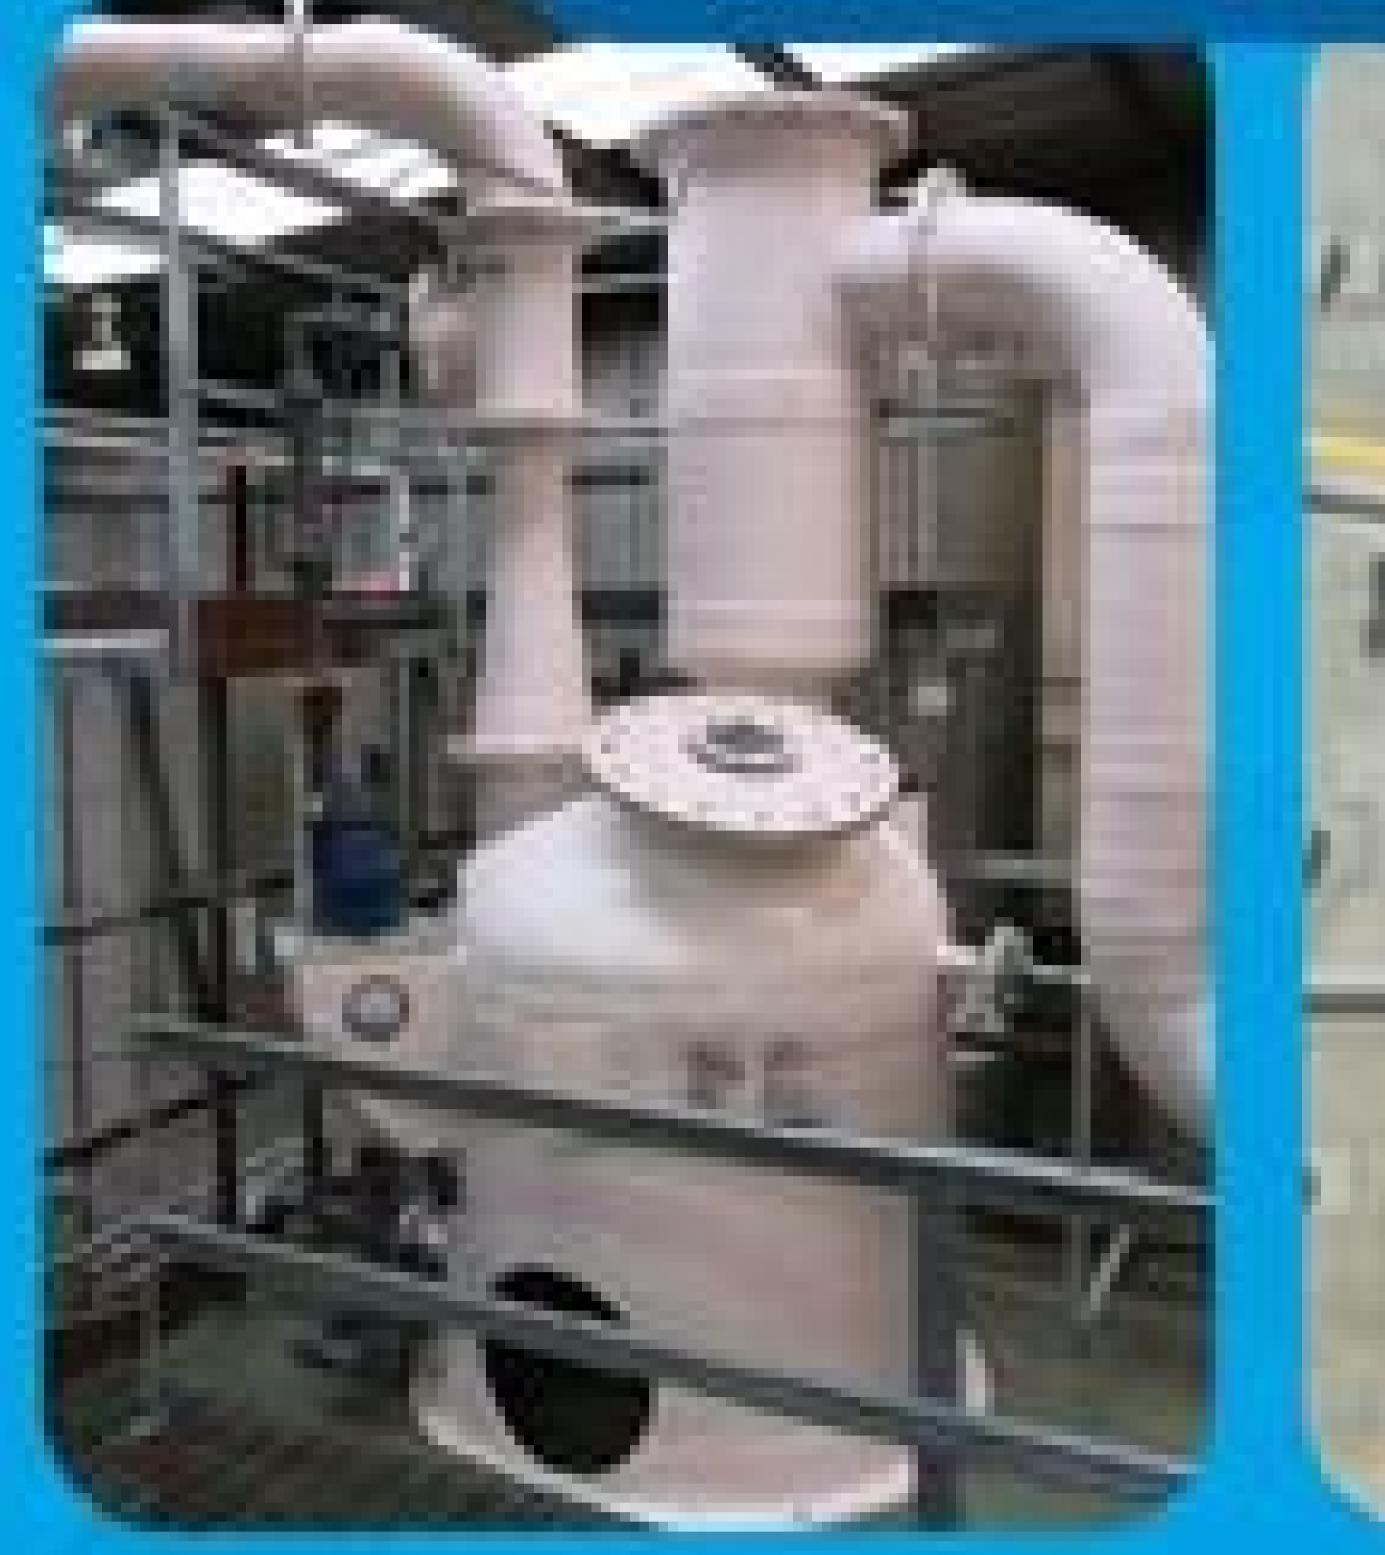

ADVANTAGES Matched metal die moulding 100% cure of GRP UV- protected ISOPHTHALIC POLYESTER-BASED SMC

HDPEPE

High & medium dencity Polyethylene are non toxic, flexible, highly restant to UV radiation , light weight mpact resistant, and has a design life of 50 years at a specified design temperature and pressure rating of the medium. Abrasion resistance is better than any other rigid thermoplastics and considerably better than steel and other metal pipes, HDPE is excellent and extremly resistant to the chemicals, solvents, sewage and waste

GRP SCRUBBER AND VESSELS

GRP HANDRAILS AND LADDERS PULTRUDED PROFILES
